

COMPARING VETAFARM'S AUSTRALIAN AND ASIATIC DIETS

Like humans, parrots can have a multitude of personalities and tastes. With this in mind, Vetafarm have created a number of diets to ensure that your bird has choice - without compromising on nutrition! Your bird might enjoy particular flavours or ingredients, and our complete diets allow them to have that choice whilst still providing nutritional balance.

MAINTENANCE DIET

Vetafarm's original parrot diet - trusted for over 25 years by breeders and companion parrot owners.

- ✓ **Extruded formula for optimum digestibility**
- ✓ **Complete Diet formulated by avian veterinarians and nutritionists**
- ✓ **No artificial colours, flavours or added sugars**

Maintenance Diet is designed for Australian and Asiatic parrots, however, it will provide excellent nutrition to most breeds of parrots. Ideal for maintaining a healthy weight - especially for birds that receive treats such as seeds and nuts. This diet can be used life-long from weaning.

NUTRIBLEND PELLETS

Nutriblend Pellets contain the same nutrition as Maintenance Diet, but has additional colours and flavours to cater for those fussy eaters!

- ✓ **Extruded formula for optimum digestibility**
- ✓ **Complete Diet formulated by avian veterinarians and nutritionists**
- ✓ **Three pellet sizes - mini, small and large to cater to all parrots**

Nutriblend pellets provide essential nutrition to all parrots. They are ideal for weaning, converting and for fussy eaters. It is important to note that when eating Nutriblend, a parrot's droppings will change to a green colour. This is not a cause for alarm - simply an indication that the bird is eating the pellets!

PARROT ESSENTIALS

Parrot Essentials is a new look at our traditional Maintenance Diet - but with an added 10% mix of seasonal fruits and nuts.

- ✓ **Extruded formula for optimum digestibility**
- ✓ **Complete Diet formulated by avian veterinarians and nutritionists**
- ✓ **Added seasonal fruits and nuts for flavour and enrichment**

Parrot Essentials suited to all parrots - especially small to medium parrots. The added seasonal fruits and nuts create choice and variety for the parrot! This diet can be used life-long from weaning!
