DATA SHEET

Breeding supplement for birds, to assist egg production and hatchability.

- ★ Essential fatty acids.
- ★ Omega 3, 6, 9.
- ★ Vitamins A, D, E.

Oil-based breeding supplement, fortified with stabilised vitamins for the addition to seed diets.

Unique formulation of fatty acids and vitamins. Used as an overnight soak on seeds, oils naturally penetrate through the seed hull into the kernel through osmosis. Assists in the normal development of egg membranes and assists birds in producing the maximum amount of fertile eggs. Batches of seed can be made up to last a week, with treated seed not used in the first day being stored in the refrigerator.

Directions: Mix 20mL of Breeding Aid per 1kg of seed thoroughly by hand and allow the mixture to sit for 12 to 24 hours to maximise seed absorption.

Recommended for: All breeding birds on seed diets leading into and during times of egg production. Particularly useful for smaller birds that produce large numbers of eggs or multiple clutches.

Can be used with: Breeding Aid is a supplement to enhance breeding success and egg membrane formation. Additional vitamin, mineral and calcium supplements are still advised for birds on seed diets.

Active Constituents: Each Litre contains:

Vitamin A	200,000 IU
Vitamin D3	20,000 IU
Vitamin E	80 IU
Linoleic Acid	430 g
Palmitic Acid	52 g
Oleic Acid	11 g

Size: Available in 100mL, 250mL, 500mL, 1L and 5L.

Item# 100mL - 00357, 250mL - 00476, 500mL - 00309, 1L - 00269, 5L - 00018

Expiry: 3 years from date of manufacture.
