## DATA SHEET

Multivet is a multivitamin, mineral and amino acid supplement designed by avian vets for year round use in all birds, including pets and breeders.

- ★ Essential vitamins, minerals and amino acids.
- ★ Ideal daily supplement for birds, includes moulting aid to assist healthy feather development.

Multivet provides a balance of nutrients essential for the general health of birds, particularly those fed on seed diets. The amino acids in Multivet are essential for the normal and healthy development of feathers.

Vitamins and proteinated minerals are included to ensure absorption in the gut.

Multivet is best used daily in young birds up to and during their first moult, then every second day afterwards as an ongoing dietary supplement.

**Directions:** Mix 0.5mL of Multivet with 150mL of clean drinking water and supply for 3-5 days each week or daily during the moult. **SHAKE WELL BEFORE USE.**

**Storage:** Store below 30°C (room temperature).

**Recommended for:** All birds on seed diets.

**Active Constituents:** Each Litre contains:

Vitamin A	94,000IU
